**Stop Corrosion Early !**

**ACUTEST**<sup>®</sup>  
**BRAKE FLUID CHECK**<sup>™</sup>  
per MAP UICS on Brake pH

**Brake Fluid Check<sup>™</sup> for DOT 3; DOT 4 & DOT 5.1**

**Stop Corrosion of the brake system before it creates an unsafe hazard or causes unnecessary breakdown and repair.**

Brake Fluid Check is easy to use. It provides fast, reliable results to determine potentially harmful, unsafe, or damaging conditions in less than a minute. Identify the need for service, show the customer the result of the test so they can participate in the service decision. Simply dip the test strip for 1 second into the brake fluid in the master cylinder reservoir, remove and read the results by comparing the pad color to the test key. Testing complies with The Federal Motor Vehicle Safety Standards FMVSS 116 and SAE J1703 specifications, and MAP UICS. Available in Bottles of 100 or in packages of 5; Part # 61100/Part # 61105
