Moisture in Waterless Coolant Specifications & Instructions

ACU4001 Series

Please read all instructions and safety information prior to using product.

Introduction

The Acustrip ACU4001 Series of test strips is a special test strip for use in maintenance of waterless coolant systems. When moisture is present in waterless coolant systems the systems protection is compromised. Avoid potential problems with the affordable, easy to use ACU4001 test strip!

Availability

The Acustrip 4001 Moisture in Waterless Coolant Test is available in bottles of 25 tests each.

Procedures

- Start with clean, dry hands and utensils.
- For best results, follow all directions carefully.
- Remove 1 test strip from the bottle and replace the cap immediately.
- Test strip must be used within 15 seconds after removing from the bottle.
- Dip and leave the test strip in coolant for 20 seconds with no motion.
- Remove and shake once, briskly, to remove excess sample.
- Wait 2 minutes 30 seconds and immediately compare to the color chart.
