ACUSTRIP's innovative Mold/Bacteria Test and newly designed 2-pad Wear Metals Test featured on the Innovation Trail at the recent Automechanika UK, held at the National Exhibition Centre, Birmingham, England in June of this year.

The products were also featured in the Automechanika Daily News on 2 separate days.

Both are part of our comprehensive fluid test strips which cover all vehicle fluids.

Press Release

ACUSTRIP Innovation Recognition Automechanika June 2017

June 2017

ACUSTRIP Company, Inc. leading fluid diagnostics since 1989 continues to bring new innovations in vehicle fluid diagnostics. ACUSTRIP® products have been proven effective with Automotive & Truck service providers, DIYers and OEMs worldwide. Customers praise the ACUSTRIP products for their reliability and ease of use.

Acustrip's innovative Mold/Bacteria test and newly designed 2-pad Wear Metals test were featured on the Innovation Trail and the Automechanika Daily News on 2 separate days at the recent Automechanika UK, at the National Exhibition Centre, Birmingham, England. The Mold/Bacteria test provides quick detection for cabin surfaces or vents to identify disinfection needs, and the success of disinfection. The 2 pad wear metal tests provide a means to test 2 automotive fluids, such as power steering, or transmission fluid, to identify the condition of the fluid, and its protection against corrosion.

ACUSTRIP® #84051 2 Test Retail package, or 84050 50 tests (Mold/Bacteria) and #70032 (2 padded Bottle of 100 total wear metals tests) are now available,
